

FINAL EVALUATION REPORT GUIDELINES

Title Page

Please include the following information on the front page of your report: name of the project; the grant amount; the dates of the project period covered by this report and the name, address, phone number and email address of the Lead on the Project.

Reporting Sections

- I. **Background (up to 1 page)** – Restate the goals and objectives of your project and describe what your work tried to achieve. If your original goals and objectives needed to be revised, note this here and discuss the reasons for the proposed changes in Section III (Accomplishments and Challenges). Briefly summarize the accomplishments and challenges you described in earlier reports.
- II. **Project Implementation and Administration (1-2 pages)** – Describe the major administrative and implementation activities of the project. These could include: hiring of staff, identification of consultants, recruitment of patients or research subjects, inception of a proposed intervention, and establishment of data bases.
- III. **Accomplishments and Challenges** – This is the most important section of the report . should account for a significant portion of the narrative. First, if your goals, objectives or activities needed to change from what was originally proposed and approved, please begin by describing the revisions and discussing the reasons for these changes.

Tell us about challenges you faced and how you addressed them. These may include: obstacles to implementation; changes to your protocol or plan; activities originally proposed that cannot be undertaken; and any internal and/or external problems. ***We have chosen to fund inventive and potentially useful projects.*** Sharing the difficulties you faced helps us to learn from your experience so we can share with other grantees potential problems they may face.

Specific examples of possible challenges include, but are not limited to: unexpected staffing changes, low recruitment rates, delays in setting up services, new regulations, changes in reimbursement, facility mergers, changes in the community that you are working in, or the appearance of a new technology in the field that may affect the issue you are addressing.

- IV. **Plan for Follow-Up after the Grant (up to 1 page)** – Outline the major tasks that will be undertaken to further the work or dissemination of your project.
- V. **Analysis and Interpretation (up to 1 page)** – In this section, please reflect not only on the project's results but also on the work itself – what does all of what you are doing mean? We are interested in learning how your work is having an impact. Is it helping to create positive changes in policy or practice? Have others expressed interest in the project and its results? We are also interested in learning if this project is having an impact on either your professional development or your organization. Have you been asked to speak about this project? Has this project led to other opportunities to work in this area, either for yourself or your organization?

Attachments

Any documents to be shared with us can be added as attachments. Examples of required items which should be included are:

- Copies of reports from any consultants or advisors where applicable
- Abstracts from presentations made to professional groups or associations, if applicable
- Copies of educational materials, manuals or other project deliverables, if applicable
- Charts, tables, graphs, or other summaries of data, if applicable
- Bibliographies or reference lists, if applicable
- A detailed final budget of grant funds used. Any unused funds must be returned to The Doctors Company Foundation.
